-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a conveyor belt, classified in class 428, subclass 172.
 - II. Claims 19-30, drawn to a toaster, classified in class 99, subclass 386.
 - III. Claims 31-42 and 48, drawn to a belt and apparatus containing said belt combination-subcombination, classified in class 99, subclass 404.
 - IV. Claims 43-46 and 47, drawn to a belt and apparatus containing said belt combination-subcombination, classified in class 99, subclass 385.

The inventions are distinct, each from the other because of the following reasons:

Invention I is deemed separate and distinct from Invention II, III and IV since it contains ribs wherein the other belts in the other groups all contain flights. The belt of group I could also be used as a belt for a treadmill instead of a cooking apparatus.

Invention II is distinct from Invention I, III and IV in that it is drawn to a specific apparatus (i.e. a toaster) that has two belts not contained in any other group(s).

Inventions III and IV are deemed two distinct combination-subcombination type groups.

Group IV is drawn to a belt and apparatus wherein the belt contains silicone flights of a specific height and can withstand a specific temperature while group III is drawn to an apparatus and belt with flights that can withstand heating zone temperatures (which can

be just about any temperature hotter than the atmospheric temperature of the location of the apparatus.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Loney whose telephone number is (571) 272-1493. The examiner can normally be reached on Mon-Fri. 8AM-4PM, maxi-flex schedule.
